

Hunters Point Naval Shipyard Superfund Site  
Update on EPA's Discussions with Navy | Radiological Remediation Goals for Buildings  
EPA-California Meeting, March 8, 2021

# Ex. 6 Personal Privacy (PP)

## Summary/review of how this discussion began

- Five-Year Review and determining whether the remedies are still protective
- Radiological retesting and public perception of risk

## Navy's evaluation of the radiation remediation goals (RGs) for buildings

- EPA's position is the Navy should demonstrate the building RGs are protective for future residential occupancy using a risk-based approach
- Considerations on the technical achievability of minimum detectable concentrations (MDCs) lower than the 20 dpm/100cm<sup>2</sup> for the removable fraction (dust)

## Discuss forthcoming meeting with the Navy

Possible dates:

- Morning of Wednesday, March 24
- Early morning of Friday, March 26
- Early afternoon of Monday, March 29

Who from DTSC and CDPH should the Navy coordinate with to schedule these meetings?
